

Moscow National Selection Conference 2019

President's Vision

In the following I would like to briefly outline the vision I have for the Board and Chairs' Team of the 6th NS of EYP Russia. I would like to make clear from the start, however, that my vision simply outlines the overall direction of the session and I consider it the foundation upon which we as a team will form this session.

Here are some reasons why you should come join me!

- **Academics:** The session theme is "*Designing an Economically Advanced Landscape*" and we will very much be working around that. This theme allows us to dig deep into current topics such as increased inequalities, the risks and benefits of technological advances, the future of our economy and much more. It also allows us to tackle problems from a very global point of view, making sure that as many aspects as possible are considered.
- **Full support from a floating board:** This is important for both potential VP and Chairs applications. VPs can rest assured that within the board we will be working as one united team. Each of us will get full ownership over their projects, topics and committees. In turn, as a chair, you can expect to be the full center of our attention. This means both academic and emotional support. Whilst we of course want you to succeed academically, the main focus of the board will be to ensure that you get the most out of the session by focusing first and foremost on who you are as a person.
- **Personal development and active contribution:** Both within the board and the chairs' team we will be working with very flat hierarchies. I consider us to be one team and am looking for people who are not only willing to participate but to actively contribute and shape this session. You will be given the time to actively seek out the areas you most want to work on and I will support you fully in finding the right means to do so. This also means that I expect self-management and reliability from team members. Open communication is key to a successful cooperation in my opinion.
- **Moscow and Russia:** In total I have spent almost 6 years learning Russian (don't ask me to demonstrate, it is still embarrassingly terrible). Having spent my exchange semester there and visited on other occasions I can truly say I am very taken by the country and its culture. Coming to Russia will open your eyes to a completely new perspective that you don't get to see in the media or other accounts. You will be greeted by warmth and hospitality and I am convinced that this session will show you Russia from its very best side.

Thank you very much for taking the time to read this and I look forward to reading your applications!

Yours, Anna
